## PROFESSIONAL SUMMARY

Software Engineer with 1+ year of professional experience building full-stack web applications in React.js, Next.js, Nest.js, Node.js, and PostgreSQL. Skilled at developing responsive UI components and integrating REST APIs and third-party services to ship production features for order management, point-of-sale, and government benefits platforms in cross-functional Agile teams.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, C, C++, Java, Python (basic), SQL, HTML5, CSS3

**Frontend:** React.js, Next.js, Responsive Web Design, Component-Driven UI, State Management, Form Validation

**Backend:** Nest.js, Node.js, Express.js, Django, REST API Design, Authentication & Authorization, Socket.io

**Databases & Caching:** PostgreSQL, Supabase, MongoDB, Redis

**Tools & Platforms:** Git, GitHub, Docker, Electron, Linux, Postman

**Practices:** Agile/Scrum, Code Review, CI/CD Workflows, Debugging & Performance Optimization

## PROFESSIONAL EXPERIENCE

### Software Engineer — FrontendEx (Remote)

Jul 2025 – Present

- Build and maintain production features for client web applications in Next.js, React.js, and Nest.js, delivering reusable UI components across concurrent projects.
- Integrate REST APIs with CMS-driven, multi-tenant configurations, including multilingual content rendering and dynamic token resolution at render time.
- Collaborate with cross-functional design, backend, and QA teams to scope, develop, and deploy scalable web applications on schedule.

### Frontend Developer — IREG-IT

Apr 2025 – Jun 2025

- Contributed to end-to-end development of web modules using React.js on the frontend and Django on the backend, delivering responsive interfaces wired to backend APIs.

## KEY PROJECTS

### Nutricloudfr — State Benefits Administration Portal | [Live Site](#)

Oct 2025 – Jun 2026

- Built and enhanced a state-level nutrition benefits portal (React.js, Next.js, REST APIs) enabling districts to manage programs, applications, and reporting workflows.
- Developed responsive UI components, multi-step form validation, and data-driven dashboards, reducing administrative processing effort.
- Diagnosed and resolved token-resolution defects across four template syntaxes in CMS-driven API responses, improving content accuracy for district administrators.

### Fulfillment Order Management System | [Live Site](#)

Mar 2026 – Apr 2026

- Developed and maintained a fulfillment application (Next.js, Nest.js, Supabase) streamlining order processing and real-time inventory tracking.
- Integrated FedEx sandbox APIs for automated shipping-label generation and workflow automation, reducing manual processing time.

### Unified POS — AI-Assisted Point of Sale System

Jan 2026 – Mar 2026

Next.js, Nest.js, Supabase, Redis, REST APIs, Llama API

- Developed a centralized point-of-sale platform handling sales processing, inventory tracking, and vendor management, using Redis caching to speed up frequent product lookups.
- Integrated the Llama API to generate stock insights and vendor recommendations, cutting manual procurement effort through automated suggestions and real-time analytics.

### Helpify — Real-Time Technician Booking Platform

Sep 2024 – Apr 2025

PostgreSQL, Express.js, React.js, Node.js, Socket.io — Final Year Project

- Engineered an on-demand labor services platform on the PERN stack supporting 100+ concurrent users at 99.9% uptime.
- Implemented real-time price negotiation and emergency service prioritization via Socket.io, reducing average response time by 40%.
- Integrated a secure payment flow processing 500+ transactions per month.

## EDUCATION

### Bachelor of Science in Information Technology

Jan 2022 – Jun 2025

University of the Punjab, Lahore | Coursework: Data Structures, Databases, Web Engineering

CGPA: 3.41 / 4.00
